	Module	Section	Function Value	New Value	Default	Description
Sports + Mode	ICMQL	3000	LCMKOD B SPORTLENKUNG	VERBAUT		Sports + Mode active

CODING 6NK

Under VCM, select read then save the FA (up top) then edit and on the FA folder, you will see something called salapa element. Once you're in there, you will see all the feature codes on your vehicle order; the one you want to change is 6NH which is your USB and Bluetooth feature - change this to 6NK and hit apply.

Once you're done that, activate the FA and right click HU_CIC folder and select code. Once your idrive reboots, you will see the office menu and extended Bluetooth. After that, right click cmb_media and code. This will allow your iphone cable to sync with idrive in the armrest.
