<sup>1</sup> Run-flat tires do not come equipped with a spare wheel and tire.

<sup>2</sup> Driving over rough or damaged road surfaces, as well as debris, curbs and other obstacles, can cause serious damage to wheels, tires and suspension parts. This is more likely to occur with low-profile tires, which provide less cushioning between the wheel and the road. Be careful to avoid road hazards and reduce your speed, especially if your vehicle is equipped with low-profile tires.

<sup>3</sup> Performance tires are not recommended for driving in ice and snow conditions.

<sup>4</sup> Check for a list of tested mobile phones at your authorized BMW center or [bmwusa.com/bluetooth](http://bmwusa.com/bluetooth).

<sup>5</sup> Not all mobile phones are compatible with Mobile Office, and some compatible phones support a limited number of Mobile Office functions. For the complete list of compatible mobile phones and the details regarding which Mobile Office functions are supported by each phone, please visit [bmwusa.com/bluetooth](http://bmwusa.com/bluetooth).

<sup>6</sup> Cruise control is not a substitute for the driver's own responsibility in adjusting speed and otherwise controlling the vehicle. After evaluating the road, traffic and visibility conditions, the driver must decide whether and how the system is used.

<sup>7</sup> Requires clearly definable lane markings that are not obscured by rain, snow, etc. Lane Departure Warning feature is not a substitute for the driver's own responsibility in maintaining safe control of the vehicle.
