

## **Combox Media Retrofit for F-Series BMW Vehicles - \$539**

### **Features of the Combox Media retrofit:**

- Album art covers (over USB port in the armrest)
- Bluetooth Audio
- Office menu (for iPhone only Contacts are currently available, other phones can have text messages, Calendar, Tasks, Emails, etc.)
- Navigation map Satellite View
- New version of the Voice Control powered by Nuance including One-Shot Destination Entry feature
- Internet and BMW Live\* (Optional. Please check the available options)

It may be required to have your CIC head unit internal software updated to the latest version for the Combox compatibility. Check with one of our specialists if you unsure about your CIC software version.

### **Important note:**

If your vehicle is currently equipped with the BMW Assist functionality and SOS systems (option 639 for USA and 633 for Europe) than both features will become permanently disabled after the Combox Media installation. You will no longer be able to use BMW Assist or SOS functions. If you would like to retain this functionality please consider the Combox Telematics installation (if available).

For the Internet and Live services to work (if option is selected) it is required to have the smartphone with the Internet via Bluetooth Tethering option available. For the iPhone 3G and iPhone 4 the Personal Hot Spot feature should be enabled at the carrier side.

Please consult with the BMW website for the list of the supported phone models:

[www.bmw.com/bluetooth](http://www.bmw.com/bluetooth)

### **Additional option:**

- Internet and Live Activation - \$99.00
- 6FL (USB/AUX in the armrest) (+\$350.00)

**Labour and coding cost - 249\$**
